

Zulfiqar Ali

Mobile Engineer (iOS | Android | Cross-Platform)

✉ zulfiqar.chandio88@gmail.com | 📞 +92-3163134857 | 🌐 Open to Remote (Global Time Zones) | [🌐 LinkedIn](#)

Professional Summary

Mobile Engineer with experience building scalable consumer and enterprise mobile applications across fintech, e-commerce, and government sectors. Skilled in developing production-ready applications, improving performance and stability, and collaborating with distributed teams.

Experienced working on native Android, iOS, and cross-platform mobile projects with strong understanding of mobile architecture, clean code practices, and full application lifecycle management.

Technical Skills

- **Mobile:** iOS, Android, React Native
- **Languages:** Swift, Kotlin, Java
- **Architecture:** MVVM, Clean Architecture
- **UI:** SwiftUI, UIKit, Jetpack Compose
- **Networking:** REST APIs, Retrofit
- **Local Storage:** SQLite, Room, DataStore
- **Tools:** Firebase, Git, JIRA
- **Testing:** JUnit, Espresso
- **Practices:** Agile, Code Reviews, Remote Collaboration

PROFESSIONAL EXPERIENCE

Android Engineer

Masafi Water - Dubai | 2024 – Jan 2026

- Developed and maintained consumer-facing mobile applications
- Worked on scalable architecture and production feature delivery
- Improved application stability and monitoring workflows
- Collaborated with product, backend, and QA teams
- Contributed to code reviews and release processes

Android Engineer (Remote)

Impact Proximity – Dubai | 2020 – 2023

- Worked on UAE government mobile applications including Visit Dubai and Dubai Calendar
- Built and maintained features across the full development lifecycle
- Improved application stability and performance
- Collaborated with remote teams across design, backend, and QA
- Contributed to user engagement improvements through feature enhancements

Android Developer

Muhimma Digital | 2019 – 2020

- Developed enterprise survey platform with offline-first support
- Implemented local data handling for low-connectivity environments
- Built reusable and modular application components

Android Developer

Mirum Agency | 2015 – 2019

- Worked on enterprise and government mobile applications
- Improved performance through profiling and optimization
- Integrated APIs and handled complex application flows

Android Engineer

Advansoft LLC – 2013 – 2015

Worked on mission-critical mobile applications for large-scale government and enterprise clients including:

- Dubai Police
- RTA (Roads & Transport Authority)
- ENOC

Key Contributions:

- Contributed across the full mobile development lifecycle
- Improved application architecture and maintainability
- Collaborated closely with backend and product teams
- Optimized performance and application startup experience
- Worked on secure, high-availability public-sector applications

Early Career (2010 – 2013)

Held progressive mobile engineering roles building enterprise, POS, and government applications. Gained strong foundation in:

- Mobile application architecture
- REST API integration
- SQLite and local storage
- Full app lifecycle ownership

Education

- BE Software Engineering – Mehran University of Engineering & Technology
